Quality Assurance

Coalmont panels are thoroughly inspected and function tested before shipment to the end user. Zero defect isn't a slogan it is our culture. Coalmont has testing capabilities for systems powered by AC and DC from 24V low voltage up to 14.4KV medium voltage.

Coalmont offers our clients the option to approve drawings before assembly. Customers may request a witness test at our facility prior to approval for shipment.

Custom Enclosures and Operator Stations

Coalmont builds customized panels, controls, skids in our state of the art facility. Coalmont's fabrication shop constructs custom enclosures, operator stations, and mobile enclosures for unique or non-standard situations. Custom panels have durable powder coated finishes to withstand harsh industrial environments.

End User Satisfaction

Coalmont panel projects begin and end with the end user in mind. Coalmont panels are designed and built to work for your application, environment, and process. Our panels are warranted for one year for defects in materials and workmanship. Your satisfaction is guaranteed.
